

# Pelzer Hochleistungs- gebläse „3P“

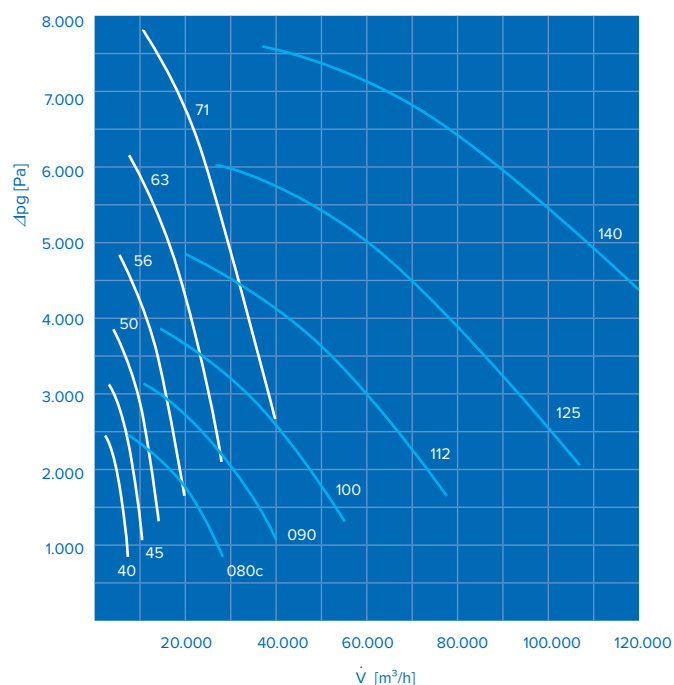

Leistungstabelle

## Kennlinie Ventilator type 3P

Drehzahl 1.450 1/min

Drehzahl 2.900 1/min

| Type<br>3P | n<br>[1/min] | V<br>[m³/h] | $\Delta p_g$<br>[Pa] | P <sub>w</sub><br>[kW] | P <sub>motor</sub><br>[kW] |
|------------|--------------|-------------|----------------------|------------------------|----------------------------|
| 040        | 2.900        | 4.320       | 1.800                | 2,7                    | 4,0                        |
| 045        | 2.900        | 6.120       | 2.300                | 4,9                    | 7,5                        |
| 050        | 2.900        | 8.700       | 2.890                | 8,8                    | 11,0                       |
| 056        | 2.900        | 12.300      | 3.630                | 15,5                   | 18,5                       |
| 063        | 2.900        | 17.400      | 4.610                | 28,0                   | 37,0                       |
| 071        | 2.900        | 24.600      | 5.740                | 48,0                   | 55,0                       |
| 080        | 1.450        | 17.400      | 1.810                | 11,0                   | 15,0                       |
| 090        | 1.450        | 24.600      | 2.260                | 19,0                   | 22,0                       |
| 100        | 1.450        | 34.200      | 2.840                | 33,5                   | 45,0                       |
| 112        | 1.450        | 48.120      | 3.610                | 60,0                   | 75,0                       |
| 125        | 1.450        | 67.800      | 4.640                | 103,0                  | 132,0                      |
| 140        | 1.450        | 91.000      | 6.000                | 190,0                  | 250,0                      |
