SPIoT

The Smart IoT Solution for
Condition Monitoring

How SPIoT Works

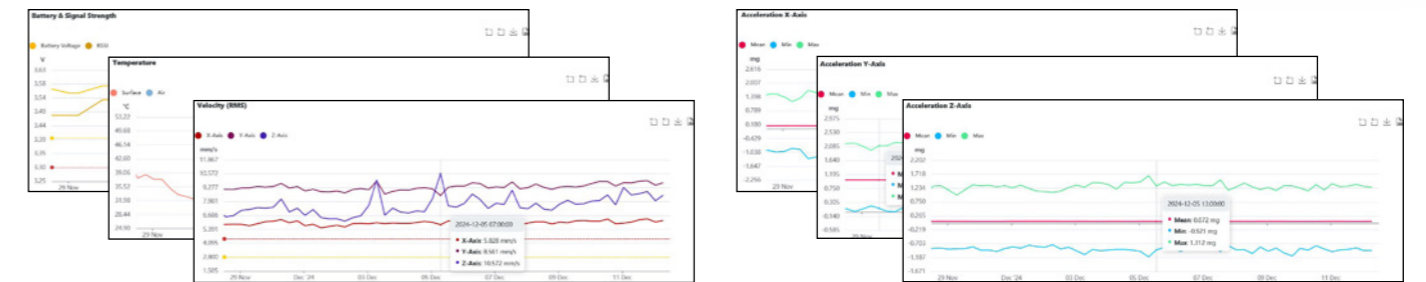

SPIoT focuses on vibration and temperature measurements, two critical indicators of machine health.

- **Precise Monitoring**
Measures three-axis vibrations and surface temperature. Customizable from daily to minute-by-minute readings.
- **Cloud-Based Data Management**
Secure data storage and analysis with customizable thresholds for accurate condition assessment.
- **Automated Notifications**
Immediate alerts via email when predefined thresholds are exceeded.
- **Advanced Analytics Platform**
Visualize and analyze operational data with clear condition classifications: Normal, Warning, or Alarm.

Proactive Maintenance for a More Efficient Future

Unplanned downtime can be costly and disruptive. SPIoT is revolutionizing condition monitoring by detecting early signs of wear and enabling swift corrective action. Our advanced solution combines efficiency, safety, and intuitive usability to ensure peak operational reliability.

Why Choose SPIoT?

SPIoT delivers simple, precise, and sustainable condition monitoring with these key benefits:

- **Fast & Wireless Deployment:** Fully operational within minutes, with maximum flexibility.
- **Secure Mobile Access:** Monitor data anytime, anywhere.
- **Instant Alerts:** Real-time email notifications for anomalies.
- **Sustainable & Maintenance-Friendly:** Replaceable batteries for long-term use.
- **Cost-Effective:** Focused on essential functionality without unnecessary complexity.
- **Easy Remote Configuration:** Adjust sensor settings effortlessly.
- **No IT Infrastructure Needed:** GSM, Wi-Fi, or Bluetooth connectivity – no additional setup required.

A Smart Fit for Any Condition Monitoring Strategy

SPIoT adapts to your monitoring needs with:

- **Route-Based Monitoring** – Flexible, scheduled condition checks.
- **Continuous Monitoring** – Real-time tracking for maximum safety.
- **Event-Based Measurements** – Focused monitoring for precise issue detection.

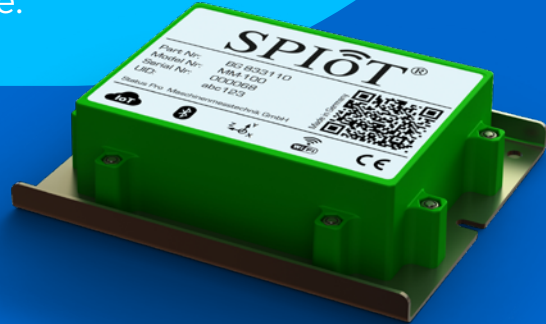

By combining these approaches, SPIoT delivers a cost-efficient, flexible, and reliable solution to keep your machines running smoothly.

Eliminate Downtime with SPlOT!

Enhance operational safety and efficiency with SPlOT.
